SG-10M IP Audio Broadcasting Server

■ Preface

Dear Customer,

Thanks for purchasing our product. Read this manual thoroughly for proper use. If you have any questions or suggestions, please contact our local sales service.

■ Features

- **Wide Compatibility:** Supports various operating systems including Microsoft Windows Server 2008 (all editions), Windows 7, Windows 10, Windows Small Business Server 2008, Red Hat Linux, and SUSE Linux. Ensures secure access with power-on and privilege passwords.
- **User-Friendly Design:** The Server is housed in a rugged industrial chassis and features a touch screen for intuitive control. It comes with robust IP broadcast control software, extensive media library, and allows users to upload or create their own recorded programs.
- **Audio Management:** Manages audio streaming services, scheduled tasks, terminal management, and user permissions. Organizes program library resources for efficient playback, providing both scheduled and on-demand media services to all network adapters, and fulfilling playback requests from audio workstations.
- **Digital Transmission:** Utilizes LAN or internet with independent IPs for digital transmission, supporting dedicated 100Mbps networks. Offers unlimited transmission range with the capability to manage dozens to hundreds of program sources, integrating multiple networks seamlessly.
- **Comprehensive Broadcasting Features:** Supports two-way intercom, broadcast monitoring, on-demand playback, real-time audio capture, terminal selection, one-click intercom, scheduled program playback, online speeches, internet radio broadcasting, automatic triggering of audio terminal devices, and fire alarm broadcasting.
